

About DataOn

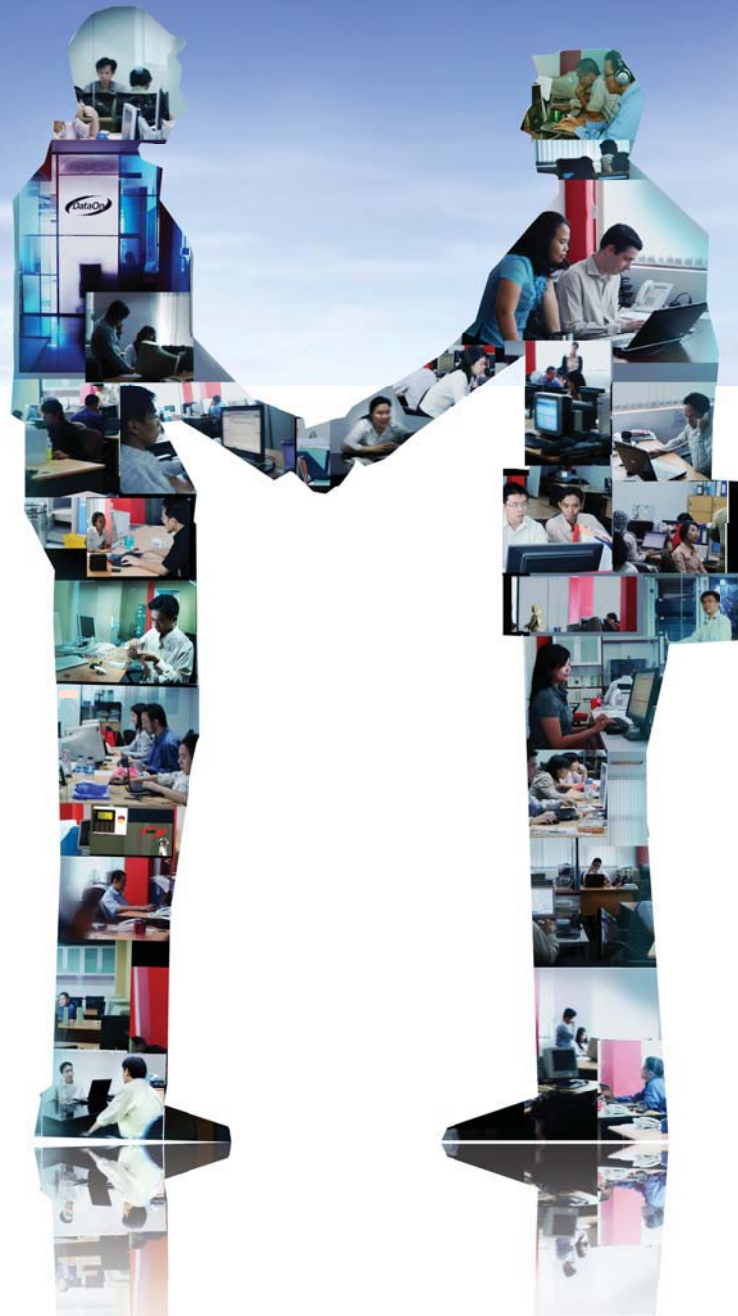

Believing that business success is driven by technology, process automation and in-depth performance analysis to anticipate trends; DataOn has developed integrated business applications that help organizations of all sizes and industries to conduct their operations more productively and achieve their business objectives.

Since 1999, DataOn has - under its SunFish product line - delivered powerful, sophisticated solutions for Human Resource Management (HRM), Enterprise Resource Planning (ERP), Finance & Accounting (FA), and Content Management (CMS) to hundreds of companies worldwide. These solutions to simplified, location and time zone spanning cooperation between customers, partners and employees and optimize all core processes that are crucial to success.

Taking advantage of modern technologies to improve efficiency; offering web-based solutions to allow ultimate flexibility in implementation; providing the lowest total cost of ownership combined with service levels that go beyond industry standards are only few characteristics that constitute customer's trust in DataOn.

It is this trust, the high quality of SunFish products, our highly talented professionals and significant expertise that helped to establish DataOn as one of the leading web-based business solution provider in the region.

It is our goal to continue delivering innovation and value to new customers while remaining focused on improving the operations of the customer who already rely on our software.

Our Product Philosophy

Reliable. Flexible. Future-Proof.

Today, IT solutions have become an integral part of business strategies and the basis for ideal processes and innovations. DataOn offers business software solutions tailored to each company's unique requirements that support them in expanding their business and realizing their growth potential. All our solutions embed tools and features that make it easy to upgrade and adapt to different environments:

- Customization. All of our products are highly customizable, so as to meet every company's unique work processes and requirements, regardless of your line of business.
- Our solutions help you seize opportunities as they arise and grow at your own pace, without having to constantly reinvent your processes and systems. Our products are formed around the business rather than changing the business to comply with the products.
- Our solutions are well equipped for global business. Flexible features such as multi-currency, multi-language and multi-legislation allow you to offer great services across all borders.

- Our solutions run on popular database systems, such as the Microsoft SQL Server and Oracle Database.
- DataOn uses the latest technology in the development of its products, thus ensuring excellent stability and performance.
- DataOn provides a unified, user friendly and open next generation engineering suite.
- DataOn constantly updates and improves its products. When ever we launch the latest version of our products, we offer our existing customers upgrades to their solutions' newest versions.

With our many years in project engagements, DataOn is a competent, professional and reliable partner who always protects customer investments in our technology through rapid implementation and cost-effective solution that meets organization's immediate needs and long-term expectations.

Our Products

SunFish HR™

SunFish HR™ (Human Resource) is a human resource management (HRM) application that will assist your organization in gaining competitive advantage by improving the way it manages its most important asset: its employees. SunFish HR™ allows you to manage almost all HR functions, from recruitment to retirement bringing together all aspects of the HR domain: information, administrative and strategic functions. These functions combined with the latest Internet and workflow technologies help transform the way your HR works.

SunFish HR™ Payroll

SunFish HR™ Payroll is the ideal solution for companies in search of a simple, fast-to-deploy and cost-effective HR solution. It allows them to automate their most important HR processes including: Payroll; Tax Reporting; Attendance Tracking and Shift Scheduling; Employee Data Administration and Career Movements. However, at the same time the payroll edition does not restrict companies to these functions as it has the flexibility – like all SunFish products – to adapt to future growth and can easily be extended to include strategic modules as the company requires such features.

SunFish HR™ Outsourcing

SunFish HR™ Software Outsourcing allows companies to gain all the advantages of various SunFish HR version without upfront investment costs or complex IT infrastructure. DataOn provides SunFish HR as a full outsourcing option where companies can choose the HR solution they need to meet their size, specific business requirement, and project scope. They get the perfect solution they require, but it is hosted, securely, at DataOn's data center. That means, while all software benefits that come with streamlining HR processes can be fully utilized, DataOn staff ensure that the system runs smoothly and securely.

SunFish ERP™

SunFish ERP™ (Enterprise Resource Planning) automates and streamlines companies' core business processes allowing them to deliver the right products, to the right locations, at the right times, in the most profitable manner using the Internet to move goods, information, and money quickly and securely.

SunFish ERP™ intertwines the information of finances, personnel resources, production and distributions with inventory management, client data bases, order tracking systems, accounting and many more thereby allowing companies to deploy and leverage the resources that are available to them (including capital, operational supplements and personnel) as efficiently as possible.
